UniTrack

Real-Time Shuttle Tracking
for the University of Lagos

● LIVE CAMPUS MOBILITY

Where Is the Shuttle?

- Unknown shuttle location and waiting time
- Unknown queue crowding
- Is waiting or walking faster?

Meet UniTrack

A real-time shuttle tracking system built specifically for the University of Lagos campus commute.

LIVE GPS

See shuttles move

QUEUE INFORMATION

Know demand before waiting

TRAVEL COMPARISON

Choose ride or walk

Track. Check. Decide.

01

Track Live

See active shuttles moving on the campus map.

02

Check the Queue

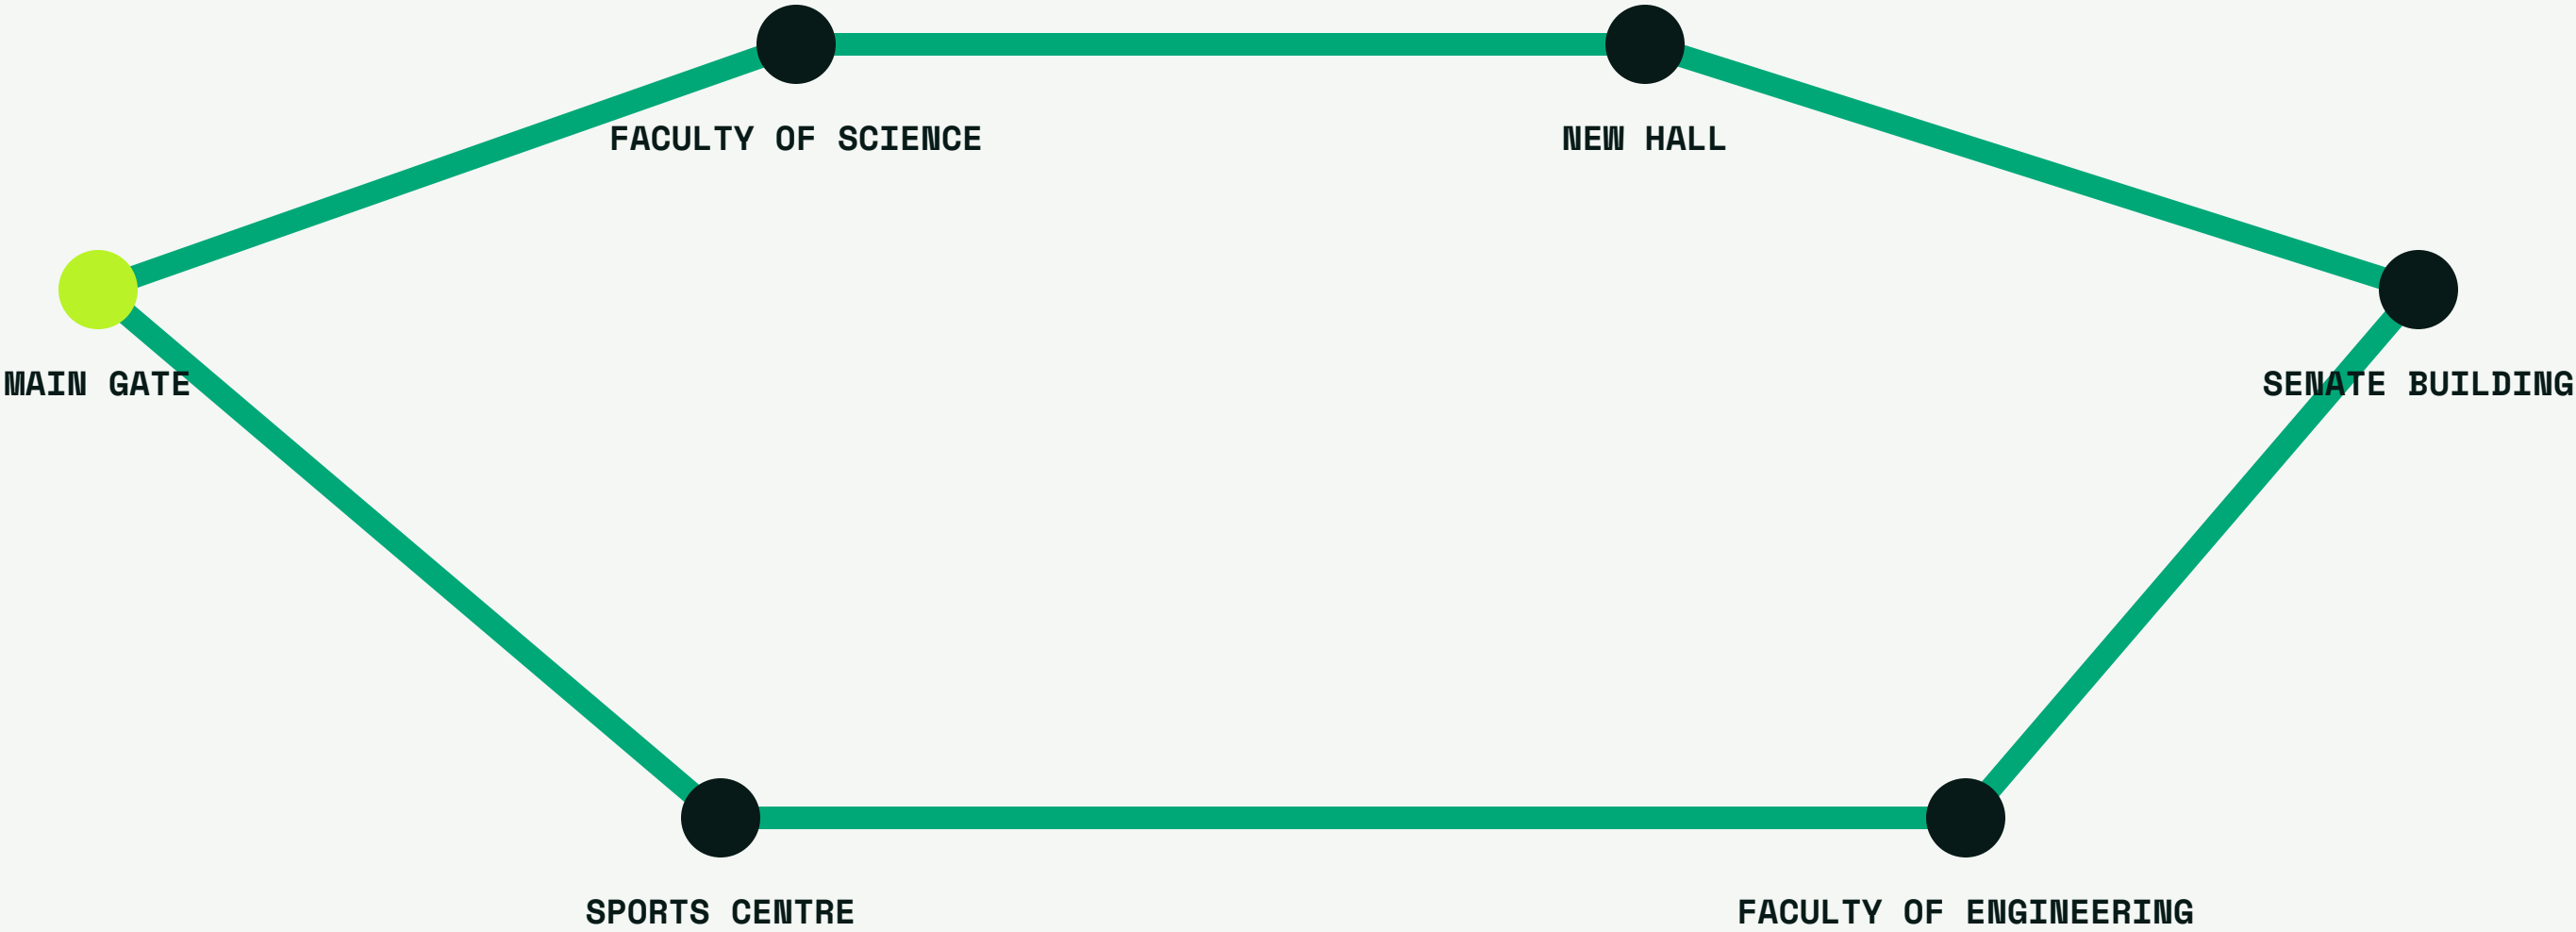

Estimate the wait with real queue context.

03

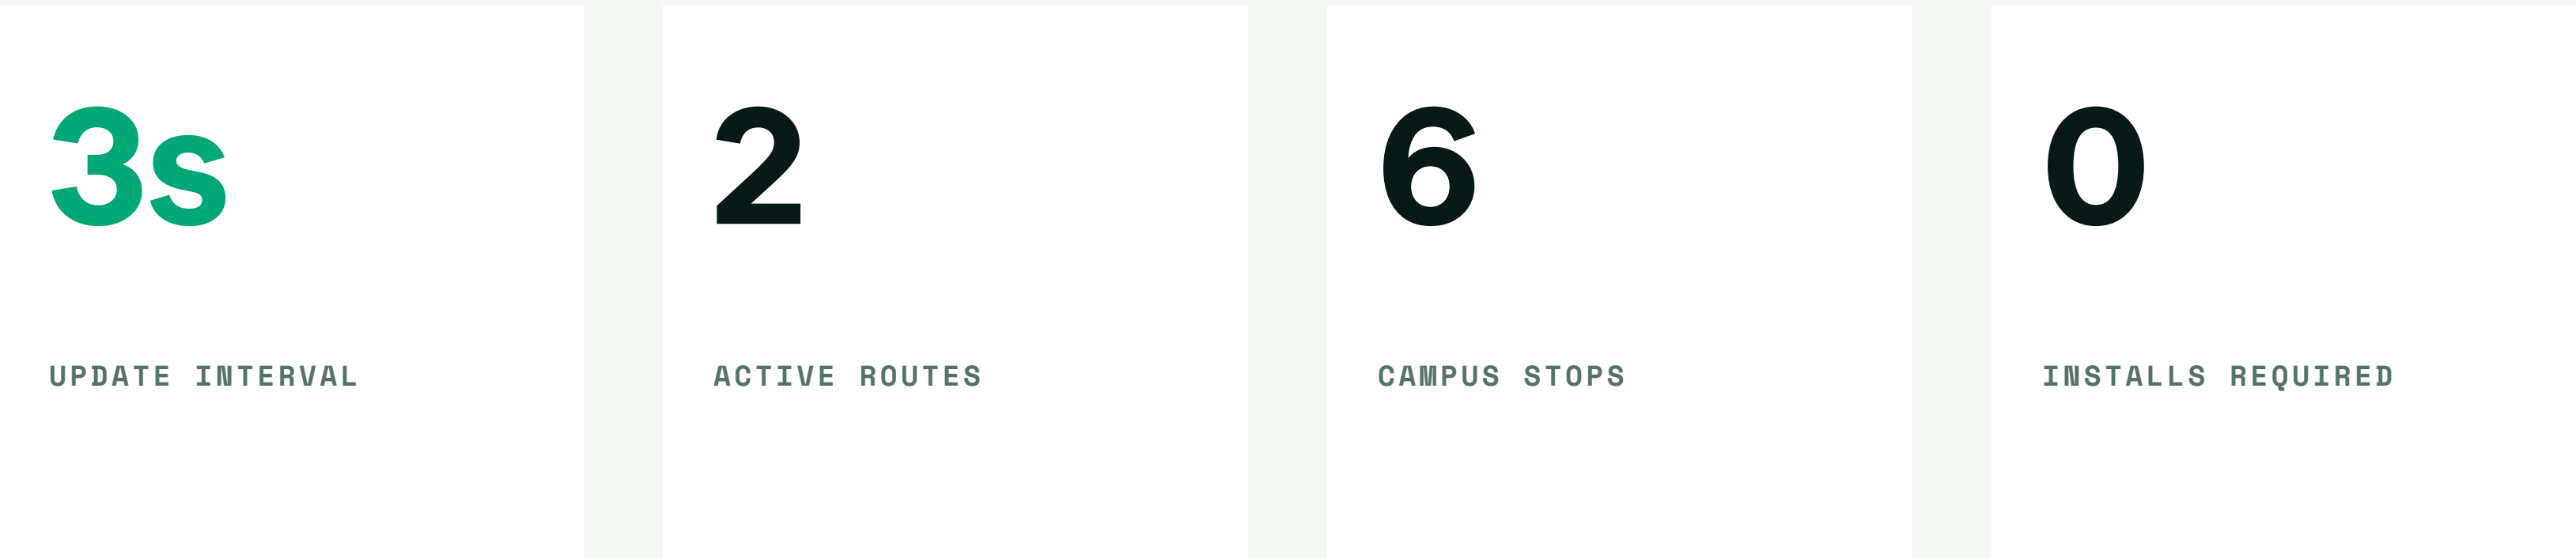

Decide

Compare riding with walking — choose faster.

One Loop. Six Key Stops.

Built for the Campus Commute

One System. Three Users.

STUDENT

Find → Track → Decide

Views location, queues and travel recommendation.

DRIVER

Drive → Share → Update

Shares live GPS while operating the route.

DISPATCHER

Monitor → Manage → Inform

Manages routes and publishes queue information.

What Makes UniTrack Different?

Should I wait — or should I walk?

WAIT FOR SHUTTLE

Location + queue information

VS

WALK

Direct alternative for comparison

A Better Commute for Students

SAVE TIME

Reduce unnecessary waiting

REDUCE UNCERTAINTY

Know where the shuttle is

UNDERSTAND DEMAND

See queue conditions first

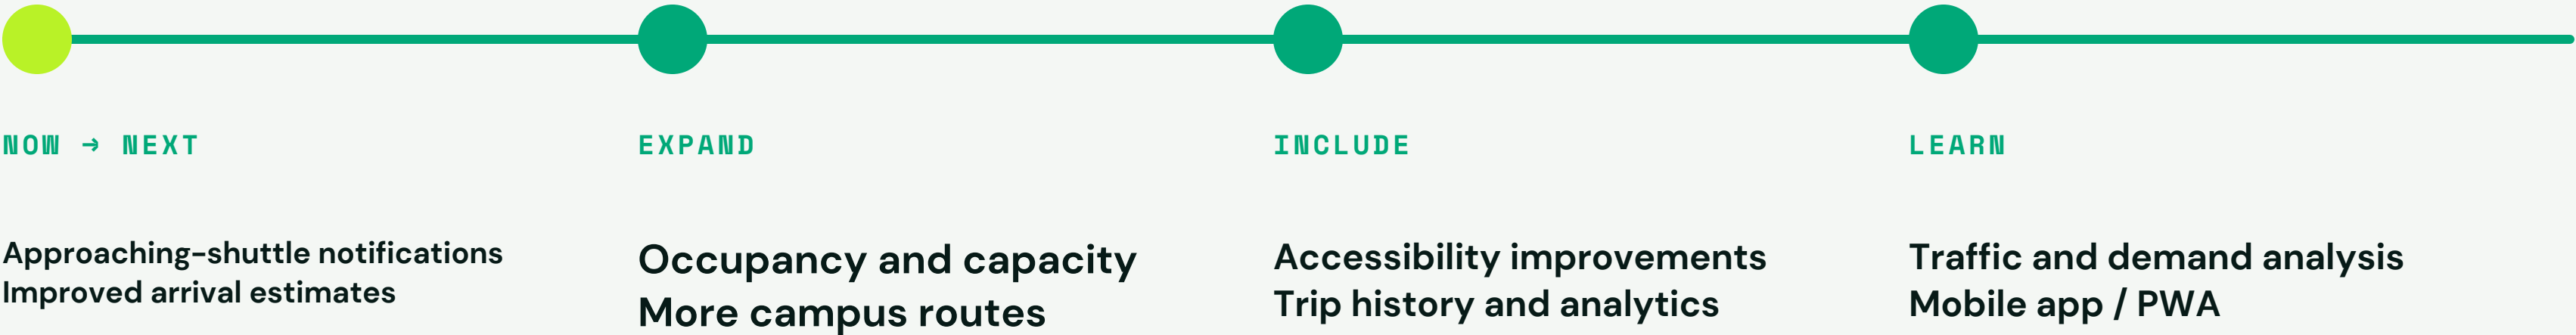

MAKE SMARTER DECISIONS

Compare waiting with walking

How the System Comes Together.
